

A1 EazyDeck-FC

NON-COMBUSTIBLE FIBRE CEMENT DECKING

A1 EazyDeck-FC is an ideal choice for architects and building owners looking for an elegant, durable, slip-resistant and fire-safe alternative to timber and composite decking.

It is perfect for balconies and other elevated outdoor spaces on residential buildings, and suitable for new-build, remediation and refurbishment schemes.

Non-combustible fixings and substructures, comprising steel pedestals and aluminium joists, complete this fully compliant system.

CLASS A SUBSTRUCTURES

For a complete fire-rated outdoor flooring solution, use A1 EazyDeck-FC in conjunction with our Class A substructures. All components have a fire rating of either Class A2-s1,d0 or better, to EN 13501-1.

This system provides exceptional design flexibility in terms of joist grid patterns and pedestal height and placement, enabling installers to easily navigate uneven substrates and obstructions.
