Service Life	30 years
2kN Load Span	Up to 600mm
Available Lengths (Typical)	3.6m

The A2 EazyDeck Alu Slim is our most slender and lightweight aluminium decking. Measuring 145mm x 17mm, these boards are available in lengths of 3.6 metres and are fixed using special fixing clips. The system achieves spans of up to 600mm between fixing points.

A fire-rated solution, it is suitable for high-rise residential buildings, both new-build and remediation schemes to replace non-compliant timber or composite decks. It is also stylish, hard-wearing, maintenance-free and anti-slip, and available in three standard colours.
