## **EazyWall**

Range of Demountable Partitioning Systems

[www.bmarchitectural.com](http://www.bmarchitectural.com)

**EazyWall** partitioning provides the perfect blend of single and double glazed systems. They are seamlessly connectable, giving the architect and end user the freedom to create inspiring working environments.

The **EazyWall** system provides the office planner with total flexibility in layout options, enabling elevation changes from single glazed to full height drywall to double glazed in any order, at any location.

## DOOR FRAMES

Our door frames are supplied as complete kits for timber or glass doors. They are made to order in any door leaf size up to 3000mm and are available in all RAL colours. Our door frames are easy to install, saving valuable time on site. The kits come with fully engineered hinge posts, strike posts, door heads and include strike plates, hinges, corner brackets, closing strips and screws.

## DOOR RANGE

Our single or double-glazed doors will not only give a sharp, slim, contemporary look to your office space, but can also offer an impressive acoustic performance of up to 39dB. With striking clean lines, the clever and unique design provides a robust door together with a simplified manufacturing process to ensure reliable and fast delivery lead times.

EazyWall

## SINGLE GLAZED - SLIMLINE EAZYWALL

The slimline **EazyWall** system is a 25mm full-height single glazed partition system which accepts glass of 10mm up to 12.8mm thick using standard tear-off glazing gaskets. The system has been designed to substantially reduce on-site installation time, particularly when transitioning between single glazed, double glazed or drywall.

Slimline EazyWall is fully compatible with Double-glazed EazyWall; cleverly designed to clip fit together they enable immediate, seamless transition from one system to another, offering design flexibility as well as valuable quick and easy on-site installation.

### DRY JOINTS

To complement the system, we offer Dry Joints and I-Line profiles, these translucent plastic sections offer effortless installation and a near seamless appearance.

#### KEY FEATURES:

- Quick and easy to install
- Clip fit sections
- 25mm head section
- Easy fit banded glazing
- Deflection head section
- Accepts 10mm to 12.8mm glass
- Uniquely designed & robust door frame
- Full integration with EazyWall range/doors
- Slimline 25mm base, head & wall sections
- Complete design flexibility
- Full technical manual available

### DEEP HEAD & WALL CHANNEL AND CLIP IN GASKET

Our 35mm deep head and wall track allows for improved glass coverage, ensuring a more robust system. Our innovatively designed translucent clip-in gasket allows for a quicker installation on site. We provide two versions of our clip-in gasket, enabling you to install 10 – 10.8mm and 12 – 12.8mm glass.

## BANDED GLAZING

The slimline single glazed framework can be easily complemented by our simple banded glazing strips to create an elegant, retro industrial look.

This art deco finish reflects the demand for definition within office design and offers an alternative aesthetic to standard office partitioning.

# DOUBLE-GLAZED EAZYWALL

Double-glazed EazyWall provides an elegant clean line of full height glazed elevations with 6mm to 12.8mm thick glass.

Our innovative design of transparent or solid mullion posts enable rapid installation and extra privacy when incorporating internal blinds. Our unique patented mullion glazing gaskets cover glass sizes from 6mm to 12.8mm, limiting the number of profiles required.

Double-Glazed EazyWall is fully compatible with Single-Glazed EazyWall; cleverly designed to clip fit together they enable immediate, seamless transition from one system to another, offering flexibility and substantially reducing valuable on-site installation time.

## KEY FEATURES:

- Clip fit sections
- Full integration with single-glazing
- Complete design flexibility
- Accepts 6mm to 12.8mm glass
- Full technical manual available
- Slimline 25mm deep base, head and wall sections
- Two unique internal mullion posts
- Compatible with standard 28mm blinds
- Uniquely designed and robust door frame

Our Double Glazed EazyWall System is compatible with our door range.

ACOUSTIC  
Up to 50dB (rW)

MAX HEIGHT  
Up to 3000mm

GLASS SIZES  
6mm to 12.8mm

DEFLECTION HEAD  
+15mm - 15mm

## CONNECTIVITY

Our EazyWall range is fully connectable enabling a seamless transition from a section of single glazing to either double glazed, full or part height drywall in any order.

Another benefit of using the EazyWall system is the minimal amount of sections needed to create junctions and corners, saving time and money.

# FINISHES

The EazyWall range can be specified in an almost unlimited array of colours which can be chosen from standard RAL and BS colours to give a unique colour scheme or to blend with an existing design; an anodised aluminium finish can also be supplied to order, this is particularly popular in black where it's used to achieve a stylish industrial look.

The use of eye catching manifestations adds that finishing touch to a space with an almost unlimited array of designs which makes the work environment a truly unique space. All products in our **EazyWall** range of office partitioning are backed by full product support from our customer service team and comprehensive technical manuals.

## PARTITION DOORS

The EazyWall system, with single or double-glazed options, will not only give a sharp, slim, contemporary look to your office space, but will also offer an impressive acoustic performance of up to 39dB.

With its striking clean lines, this clever and unique design not only provides a robust door, but also through a simplified manufacturing process, we will ensure faster delivery lead times, challenging the industry norm. The unique patent pending design allows for door closers, lever handles, D handles and drop down seals to the full width of the door.

## SLIM FRAME

Due to the unique patent pending door profiles, an ultra slim, uninterrupted frame has been created, enabling us to present a larger area of clear glass. The result is a contemporary, minimalist aluminium door for the modern office environment.

## ACOUSTIC TESTING

Our single-glazed door achieved a certified 36dB Rw, when tested with 10.8mm glass. Our double-glazed door achieved a certified 37dB Rw, when tested with 6m & 8mm glass and 39dB Rw, when tested with 6mm & 9.5mm glass.

### KEY FEATURES:

- Unique design
- Slimmer frames
- Acoustically tested
- Robust and elegant
- Choice of colours
- Multiple mounting options

### COMPATABILITY

The EazyWall door range is fully compatible with the EazyWall Single Glazed and Double Glazed Systems.

**For more information, please contact BM Architectural on 0114 254 3226.**

## MADE TO ORDER

The EazyWall range of doors is manufactured to suit the specific requirements of our customers. The unique design allows for door closers, lever handles, D handles and drop down seals to the full width of the door. We will issue a detailed drawing once an order is received to ensure all details are correct, checked and approved prior to manufacture.
